

Elan D. Louis is Chief of the Division of Movement Disorders and Professor of Neurology and Epidemiology at Yale School of Medicine. Dr. Louis' principal academic interest is degenerative diseases of the central nervous system, focusing on disorders of involuntary movement. He has a particular interest in essential tremor (ET), and his research efforts have focused on a broad spectrum of issues including its epidemiology, genetics, clinical features, and underlying pathology. Through his research, Dr. Louis has challenged many of the prevailing notions about ET and has substantially re-created the dialogue in the ET field. He has received continuous funding from the National Institutes of Health since 1995. Dr. Louis is the author of approximately 600 peer-reviewed scientific publications and book chapters and is the founding Editor-in-Chief of the peer-reviewed journal Tremor and Other Hyperkinetic Movements. He is the current editor of Merritt's Textbook of Neurology.
